Meteor Granito

Description

Meteor Granito porcelain tile is a starry heaven; the black of deep space with stardust-like flecks. This porcelain creation, with little variation between tiles, will be a brilliant and striking addition to an infinite number of pool deck projects. A shooting star in our expanding universe of porcelain options.

Why choose Meteor Granito Porcelain?

Meteor Granito porcelain tiles are hard, dense and durable, making them very resistant to staining. The 'Grip' finish is rated P5 due to the non-slip finish on the tiles, making them ideal for use around swimming pools and outdoor areas. The surface finish is comfortable on the skin and gentle enough for swimming costumes. The depth of colour will retain heat in the sun. The tiles are accurately sized, cut well and are easy to lay. Meteor Granito Porcelain will add flare and make a stellar statement whilst needing minimal maintenance.

Finish

Grip

Maintenance

Minimal maintenance is required and these tiles do not require sealing. Porcelain's dense surface absorbs very little moisture, so spills that might seep into another material and cause a stain, can easily be wiped up with a damp cloth or hosed off. Meteor Granito Porcelain generally only needs to be swept and regularly cleaned with water and a mild detergent.

Porcelain tiles do not need sealing due to having little to no porosity. However, some people choose to seal their porcelain, as there is no doubt it makes cleaning easier. Sealing will especially assist with the cleaning of the grout. After sealing their porcelain, some customers have told us that they even vacuum their tiles!! Please ensure you use an appropriate 'porcelain specific' penetrating sealer. We recommend seeking assistance from John from Stone Clean and Seal for advice.

Slip Rating (Wet Pendulum)

This tile has a P5 slip rating in the (V) pendulum classification which is the highest wet pendulum rating available under the current standards. (For pool surrounds, a minimum of P4 is required.)
