Silver Travertine

Description

Silver Travertine is a diva in the tile world. She is a cool, stunning headline star with many shades of whites, browns and silvers. She will only go home with those who unconditionally accept and cherish her uniqueness.

Why choose Silver Travertine

Silver Travertine contains a stunning mix of light and medium silver and brown coloured tiles. Often called Platinum Travertine, this material is widely used outdoors and occasionally indoors. Unfilled Travertine has natural holes in the surface adding texture to the finish and a rustic appearance. Some clients instruct the tile layer to in-fill some of the larger holes at the time of grouting. Silver Travertine is hard wearing and its natural colour variation hides marks very effectively. It is very cool underfoot so ideal to use in any climate. It offers high slip resistance. Travertine is accurately sized, cuts well and is easy to lay.

Finish

Slight Bevel Edge and Unfilled

Maintenance

Requires sealing. Seal with penetrating sealer to make cleaning easier. Use pH neutral cleaners. Do not use acid to clean.

Slip Rating (Wet Pendulum)

This tile has a P5 slip rating in the (V) pendulum classification which is the highest wet pendulum rating available under the current standards. (For pool surrounds, a minimum of P4 is required.)
