

SS005 Almond

Panel Size

550x150mm

You'd be nuts not to consider Almond stacked stone cladding. This mixture of beige, light almond, earthy light ochre and soft grey coloured quartzite would make a naturally calming and elegant addition to any exterior or interior feature wall. The incorporation of the varying light colours makes it possible to merge seamlessly with a wide range of different natural stone or porcelain coping and surrounds options.

Just like a bag of tasty mixed nuts - Almond is always a favourite!
